

X2nSat COMPANY OVERVIEW

X2nSat is a forward-thinking company leading the way into the future of satellite communications. Founded in 1996, X2nSat is helped by a visionary executive team that is constantly pursuing excellence and innovation so that clients receive the best solutions and service. Providing highly reliable, wireless network and communication solutions to a wide variety of industries, X2nSat is comprised of state-of-the-art, high-capacity satellite gateway sites and a 24x7x365 Network Operations Center. Clients appreciate the strength of X2nSat's robust network infrastructure and its close proximity to the engineers and technicians who manage their networks.

Satellite Solutions

X2nSat provides satellite solutions to organizations throughout North and South America, as well as locations in the Pacific Rim, Asia, Western Europe, and Africa. Operating its primary satellite gateway at its Telecom Valley headquarters in Petaluma, California, X2nSat also operates a backup facility in Norcross, Georgia, and is currently establishing a third satellite gateway in New Mexico.

X2nSat's services and solutions include:

- Broadband connectivity services
- SCADA connectivity
- POS connectivity
- Business Continuity
- Network design
- System design
- Network management
- 24/7 proactive network monitoring
- Installation
- Remediation

Making a Difference in the World of Telecommunications

X2nSat's experienced team of engineers, field services technicians, Network Operations Center staff, and project experts are dedicated to providing the highest quality performance and service in the satellite industry. X2nSat's business continuity, wireless broadband, and SCADA network (ST4G) solutions round out a comprehensive approach to solving mission-critical network availability for organizations of any size.
